

Love Life Boost opens juice bars across UAE

Love Life Boost, a juice bar started by an Australian mother of three, has entered the UAE in a big way, with stores opened at Mirdiff Up Town, Sharjah Airport and a new one in the Festival City.

The brainchild of Janine Allis, Love Life Boost, offers an extensive range of freshly squeezed juices, making it easy for consumers to achieve their daily intake of fruits and vegetables.

It all started with Allis' constant worry about the lack of healthy foods readily available for her young boys.

All this changed after a trip to the US where she noticed the growing juice bar industry, and she decided to open her own juice bar.

She consulted with nutritionists and naturopaths to create a menu of healthy juices and smoothies.

The result - a range of lip-smacking varieties that are all at least 98 per cent fat free and contain real fruit, without artificial colours or flavours.

Just eight years later, the popularity of her juices and smoothies has enabled her to grow the first single juice bar into a network of stores in more than ten countries.

Boost

A freshly squeezed juice from Boost can also be a great way to top up your energy levels. It tastes fantastic and is packed full of nutrients to help keep your health in check.

A recent study from the US has proven the substantial health benefits of consuming fresh 100 per cent juice on a daily basis, particularly for children, resulting in higher intakes of energy, carbohydrates, vitamins C and B6, Potassium, riboflavin, magnesium and iron.

Love Life Boost has also introduced the 30ml Wheatgrass Shot

E manufacturers a substantial price increases, some manufacturers rate increases of up to about 22 percent. This is also following the vitamin B, vitamin C products after the price hikes, another series of varieties of vitamin price hikes, marked the vitamin industry entered a boom period, mainly related to the listed companies benefit from the natural Obviously, the valuation has been further improved. 600812 North China Pharmaceutical production of vitamin B12 first in Asia and second in the world, and its subsidiaries are manufacturers of vitamin C, vitamin prices subject shocking full. This week, the stock moderate
