

Which TV Actor Is 'A One Man Health Epidemic'?

Today we have a football player who can drink, a skeezy casting couch situation, an STD-riddled TV actor, and a PA fed up with covering for his cheating boss.

1) "Which NFL star would be done if his tequila guzzling skills were to surface? The fella can toss back half a bottle in one gulp without wincing."

NYDN

2) "Which celeb demanded a casting call for his new film so he could vet potential extras - and sleep with them?" Mirror

3) "This C+/B- very good looking television actor is on a hit network drama. It is one of those law/crime/initial type shows. Anyway, this actor is a one man health epidemic. Our actor found out he has herpes about three months ago. Despite that fact, he never tells any of his prospective male or female mates that, and in fact, tells them the complete opposite and insists on never using condoms. Well, now, two of his conquests are threatening legal action about their brand new STD's. So far our actor has kept things quiet, but with as many people as he sleeps with, keeping it quiet for much longer is going to be very difficult." CDaN

4) "Which celebrity's Personal Assistant just walked out on him? The PA was overwhelmed with guilt about having to lie constantly to the star's wife about where the boss was and what he was doing ... and who he was doing it with. No gay gossip here. Just a horndog with a lust for beautiful women. Given that this actor isn't the most handsome guy in the world, you'd think that he'd be a little more loyal to his sweet wife." BlindGossip

Fuel economy? Bah. Jalopnik test-drove the new Chevy Camaro.

What new games for Nintendo's insanely addictive Wii? Kotaku is at next week's videogame showcase to find out.
